## **DETAILED ACTION**

### ***Response to Amendment***

1. The amendment was received on 7/8/08. Claims 23-39 are pending.

### ***Response to Arguments***

2. Applicant's arguments, see remarks, page 8, last paragraph, filed 7/8/08, with respect to 102(e) have been fully considered and are persuasive. The rejection of claims 23-39 has been withdrawn.

### ***Allowable Subject Matter***

3. Claims 23-39 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter:

Claims 23 and 33 are allowable, because as applicants have properly pointed out on page 8 that "none of the references alone or in combination disclose the claimed features." Given that this statement is broad, more specifically the references do not teach the claimed "local process variation" since as applicants has properly pointed out on page 6 of the remarks, filed 10/24/07 that states, "As is also well known in the art... 'local process variations' are...a localized variation." Thus, the "local process variation" is a term of art that is missing in the cited references as applicants has properly pointed out on page 9 of the remarks, filed 3/24/08, that states, "Nikoonahad is **not** referring to local process variations" on page 9 of the remarks, filed 3/24/08, that states, "Raymond does not teach...local process variations" and page 11 of the remarks,

filed 3/24/08, that states, "Stirton does not teach...local process variations" and page 11 of the remarks, filed 3/24/08, that states, "Mieher is **not** discussing local process variations"

Thus, respective dependent claims are allowable, too.

The closest prior art is Chapman (US Patent 6,517,669) that teaches "As will be appreciated by those skilled in the art, local process variations in the semiconductor manufacturing process are common and can be accounted for" in col. 6, lines 9-13. However, Chapman does not disclose or render obvious the majority of claims 23 and 33.

Another prior art, Matsumoto et al. (US Patent 7,229,566) is pertinent as teaching a variation within a grating as represented in fig. 7 where the variation was due to a defect of the grating which broadly corresponds to the claimed local process variation. However, given that Matsumoto is silent regarding the claimed local process variation, which is a term of art, Matsumoto does not render applicant's claims as anticipated or obvious.
